Office Action Summary

Art Unit: 2839

Restriction to one of the following inventions is required under 35 USC 121:

- I. Claims 1-18 drawn to a stretchable interconnect, class 439.
- II. Claims 19-30 drawn to a process of making a stretchable interconnect, class 29.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product could be made using separately added interconnect rather than one deposited directly onto a substrate that supports the devices being connected.

Because these inventions are distinct for reasons given above and have different classifications, restriction for examination purposes is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to N. Abrams at telephone number 308-1729.
